Objective:

Computer Science student at El Shorouk Academy (3rd year), with a strong interest in Data Analysis, Data Visualization, and Dashboard development. Passionate about Artificial Intelligence and continuously learning to build a solid foundation in Machine Learning. Seeking opportunities to apply analytical skills, growing technically, and gain practical experience in the data and AI fields.

Education:

- BSc of Computer Science (undergraduate)
- Faculty of Computer and Information, El Shorouk Academy
- Expected date: 2028
- GPA: 3.11

Courses:

- DEPI – Data Engineering Program Nov 2025-July 2026
- Comprehensive training program covering SQL, Python, Advanced Python, Big Data Processing, and Microsoft Azure. The program focuses on data engineering fundamentals, AI-related data engineering concepts, and building scalable data pipelines, with practical exposure to real-world data and analytics scenarios.
- Power BI – Data Analysis & Visualization (Self-Study) Sep 2025-Oct 2025
- Practical experience using Power BI for data analysis, creating measures and KPIs, and designing interactive dashboards and visualizations to support data-driven decision making.

Skills:

Soft Skills: Self-motivated | Attention to detail | Critical thinking | Communication | problem solving | Teamwork | Time Management

Technical Skills: Python | C# | Data Analysis & BI (Basics) | Concepts: OOP | SQL | MongoDB | Azure | HTML | JS | CSS | PHP

Language Skills: Arabic (Native) | English (Good) | French (Basic) | Japanese(Basic)

Projects:

- Real-Time Traffic Analytics and Prediction
 - Engineered a live traffic data pipeline utilizing Python and TomTom API
 - Managed streaming via Azure Event Hubs and Stream Analytics
 - Utilized Azure SQL Database for storing data for reporting
 - Built Scikit-learn ML models to forecast congestion levels
 - Created interactive Streamlit dashboards for performance visualization
 - Integrated Azure Logic Apps for automated congestion notifications
 - Employed Git/GitHub for version control and team collaboration
 - Tech: Python, Azure, SQL, Streamlit, Scikit-learn, Pandas, Git
- Database Management Project (MS Access)
 - Designed relational database using MS Access
 - Created queries for data retrieval and reporting
- Data Analysis & Visualization Project (Power BI)
 - Built interactive dashboards for data insights
 - Performed data cleaning and transformation
- Hotel Management System (File-Based)
 - Developed a Windows Forms application using C#
 - Implemented file-based data storage for room reservations
 - Applied logical deletion and file squeezing (compaction) techniques
 - Managed room availability and customer checkout process
